

EduAssist MVP Plan (Minimum Viable Product)

Goal: Build a simple working product that solves the core problem of fee management and digital receipts. Focus on getting the first 3–5 schools instead of building a full-featured system.

Core Idea

Focus only on fee collection, digital receipts, and basic parent communication.

MVP Features

- Login system (Admin and Parent)
- Student management
- Fee entry system
- Digital receipt generation
- Fee history tracking
- Simple admin dashboard

Features to Avoid in MVP

- Attendance system
- Report cards
- Homework modules
- Complex UI
- Multi-language support

Recommended Technology Stack

- Flutter (for Android & iOS app)
- Firebase (backend and database)

Timeline (30 Days)

Week	Work
Week 1	UI design and database setup
Week 2	Login and student management
Week 3	Fee and receipt system
Week 4	Testing and bug fixing

Estimated Cost

- Freelancer: ■30,000 – ■80,000
- Experienced Developer: ■80,000 – ■1,50,000

Testing Plan

- Start with one school
- Offer free trial for 1 month
- Collect feedback and fix issues
- Then expand to more schools

Success depends on building a simple product, getting real users, and improving step by step.
Focus on solving one problem extremely well.
